EDUCATION

- **Computer engineer**
  Technological University of Chile
  INACAP
  2016-2020
- **diploma in mobile application development**
  University Pontificia Universidad Católica de Chile
  2022-2023

PROFILE

I am a Chilean professional with over 3 years of experience in the Santiago Stock Exchange, currently positioned as the second-largest stock exchange in Latin America. I have a proven track record of implementing systems for the stock market using agile methodologies such as SCRUM and XP. My technical expertise includes working with a range of technologies, including Java, Angular JS, JavaScript, ReactJS, NodeJS, and React-Native

EXPERIENCE

- **Software Engineer**

  Bolsa de Comercio de Santiago
  2021-Now

  As a Software Engineer, I was part of the team responsible for adapting the same trading system used in Chile for the Stock Exchange of the Dominican Republic. This involved a comprehensive and parameterized adaptation to ensure that the stock market could seamlessly accommodate the specific trading practices of the country.

- **Programming analyst**

  Bolsa de Comercio de Santiago
  2020-2021

  While serving as a programmer analyst at the Santiago Stock Exchange, I spearheaded the implementation of the initial web-based user management system integrated into the existing Sebra HT trading platform. This achievement was realized through the adept application of agile methodologies, particularly SCRUM, and the skillful utilization of a diverse set of technologies, encompassing JavaScript, Angular JS, Kendo JS, HTML, and more.
